ANNEX 5 – Programme sheets

In order to elaborate these sheets presenting the organisation and the legal structure of the 64 INTERREG IIIA programmes, VIAREGIO made use of a number of documentary resources (cf. bibliography) as well as, for some of the programmes of the sample, information obtained by the interviews carried out or the questionnaires sent.

The information figuring on these sheets is in no case complete and is subject to a number of limits, particularly in terms of availability of documents. In addition, most of the programme sheets of the programmes of the sample are completed by a graph on the programme structures and organisation. The graphs for the other programmes can be consulted in the 'Programme Summaries' or programme documents.

The symbol - - - indicates in the structure in question or does not exist, or that no specific information has been obtained on this structure.

Moreover, the list of the internal and external Intermediate Bodies participating to the implementation of the programme is not complete either: the aim here is simply to remind the principal technical units among the partners (internal IB) or the main cross-border cooperation structures or other external actors, other than those performing the main administrative functions of the programme (MA, PA, JTS), participating in its management.

Nevertheless, these sheets allow giving an idea of the main characteristics of each of the INTERREG IIIA programmes in terms of organisation and legal structure.

NOTA BENE

The terms 'micro projects fund' or 'small projects fund' will be alternately found in this document, depending on their specific name given by each programme. These two terms however refer to the same type of scheme, which is presented in the study under the name 'Small Projects Fund'.
